

# California OES Weather Threat Briefing

Friday, April 5, 2019  
9:00 AM PST

Day 1: Gusty winds, snow and heavy rain expected across  
northern CA today

---

National Weather Service  
Western Region Headquarters  
Regional Operations Center  
Salt Lake City, UT

# **WEATHER KEY POINTS**

**04/05/19 - 04/11/19**

## **Friday**

- Gusty winds to 40 mph are expected across the northern Sacramento Valley this afternoon with impacts to travel and localized property damage.
  - Heaviest rain has already passed and additional showers and thunderstorms will be rare but possible this evening.
  - Flooding is possible over the Carr/Delta burn scar through this evening due to heavier rainfall rates in thunderstorms.
- Late season snow expected over the Northern Sierras passes above 6000 ft through early Saturday
  - The heaviest period of snow and gusty winds are forecast this afternoon

## **Saturday**

- Gusts to 55 mph possible along the far northern coast of California Saturday.
- Additional rain showers will move west to east across Northern California beginning Saturday morning. No impacts are anticipated.

## **Sunday-Thursday**

- An additional wet weather system is expected late Sunday into Tuesday.
  - The wet pattern is expected to continue through next week.
- Offshore winds develop across Southern CA Sunday and significantly raise high temperatures into the upper 70s to low 80s through early next week.
  - Strong winds are expected to develop across Southern CA Monday through Wednesday.
- Relative humidity will drop to near 15 to 20 percent across southern California on Monday, with increasing winds.
- Below normal temperatures will develop late next week and persist through next weekend.
